

Natural gas is a **Wise choice**

Natural gas is a valuable energy source that is used for cooking, heating and more! Natural gas is affordable, reliable and safe.

AFFORDABLE: Households that use natural gas for heating, cooking and drying clothes save money.

RELIABLE: In extreme weather events, the underground delivery system for natural gas provides reliable service that consumers can trust.

EFFICIENT: Natural gas utilities are reducing emissions from their operations and helping consumers shrink their carbon footprints. This helps the environment.

RCFAENU _____

DID YOU KNOW?

Natural gas is colorless and odorless. For safety, your natural gas company adds an odor to natural gas to help detect gas leaks. The odor added to natural gas is stinky like a skunk or rotten eggs.

If you ever smell something like this, leave the area immediately and call your local gas utility to report the smell.
