

WHERE DOES NATURAL GAS GO INSIDE THE HOME?

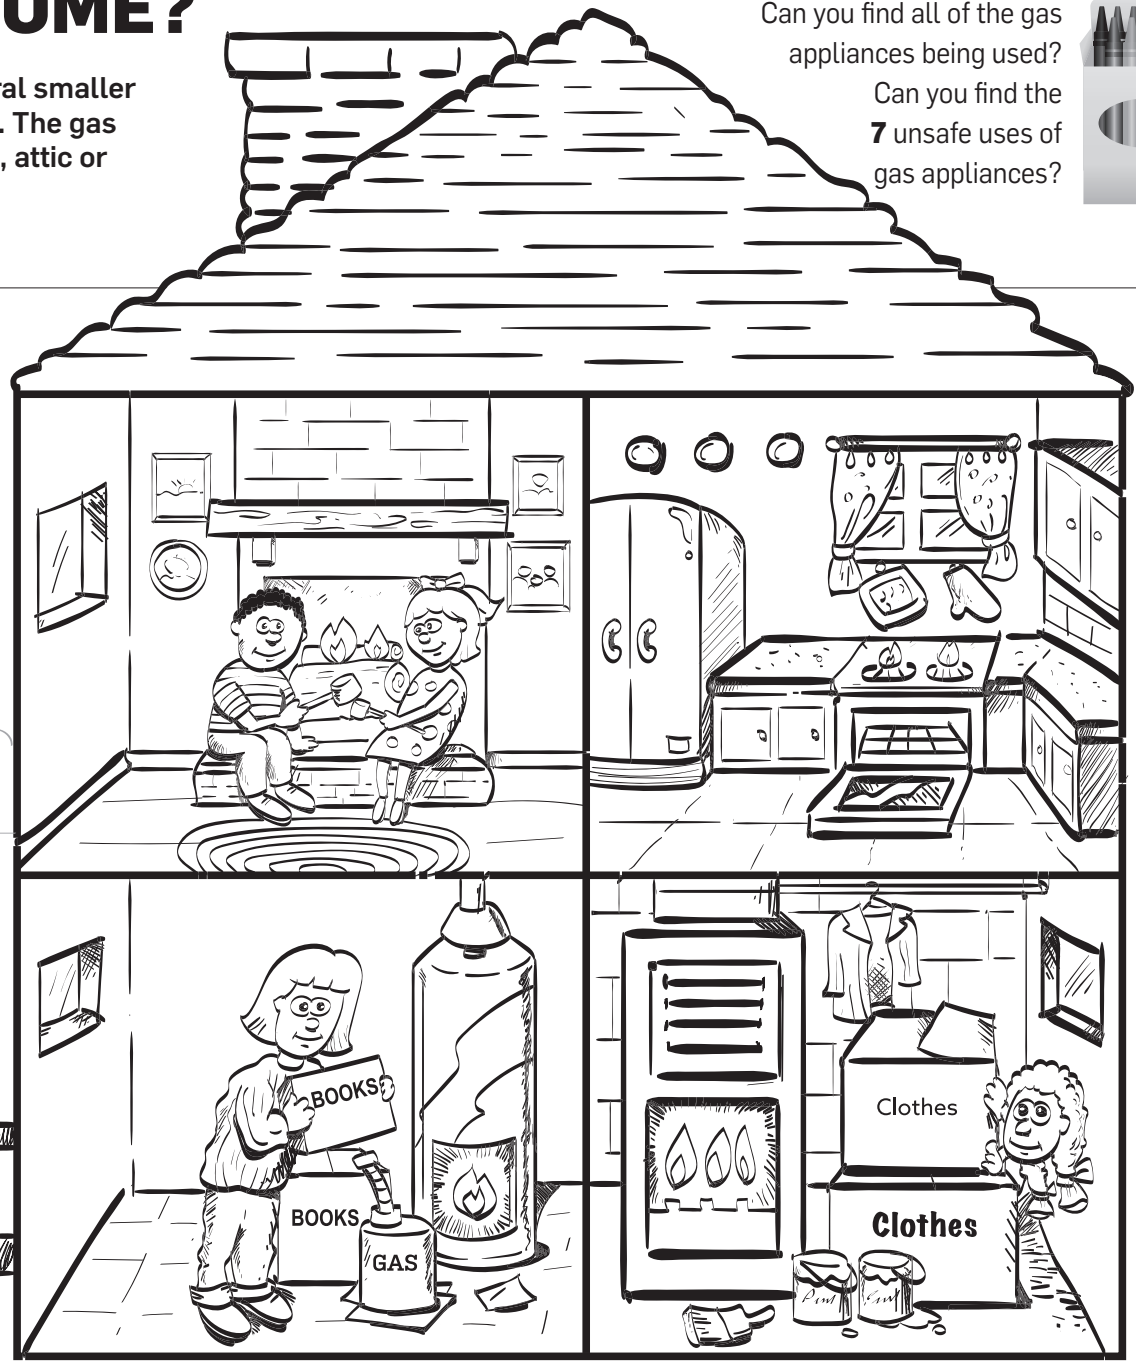

Inside your home, the main gas line branches into several smaller lines that travel to each appliance that uses natural gas. The gas water heater and furnace are often found in a basement, attic or garage.

Can you find all of the gas appliances being used?
Can you find the **7** unsafe uses of gas appliances?

Hint: Color all the flames on natural gas appliances blue, not yellow. A blue flame means that it is safe.

Answers: Outside: Boy lighting gas grill by himself, Man digging near gas meter; Living Room: Children playing around gas logs; Kitchen: Gas flame on stove is unattended, gas stove is used to heat a room; Basement (left): Flammable items are near water heater; Basement (right): Flammable items are near gas heater.
